👤 Profile

I'm someone who's always striving to improve, gain experience, and keep learning. I've got a curious mind, and I enjoy experimenting on my own. I'm particularly drawn to front-end technologies, which I'm actively specializing in. However, I'm also genuinely curious about backend aspects. I'm good at picking up things fast and staying determined to reach my goals. I do admit I can be pretty stubborn at times. I usually see things optimistically, and when it comes to being social, I'm a mix of both outgoing and reserved.

📁 Professional Experience

Front-end developer at YunexTraffic s.r.o. [🔗](#)

05-2022 – present

Brno, Czechia

Responsibilities:

- Maintenance and development of the React component library.
- Development of multiple web applications.
- Tech stack: React, Typescript, Redux, GitLab CI/CD, Jira, (MUI, Mapbox).

Achievements:

- Improved performance of multiple react components for low-end devices.
- Leading role in major releases of inner packages and UI library.
- Enhanced code quality across various legacy projects by implementing linter tools and performing comprehensive refactoring and codebase linting.
- Improved UX of applications with code reviews, discussions and merge requests.

Web Developer at Papirfly [🔗](#)

07-2021 – 04-2022

Zlín, Czechia

- Development of web applications and various websites for clients.
- Tech stack: JavaScript/TypeScript, Angular, CSS (SASS), HTML, Gulp, Pug, Mapbox
- As the sole FE dev on the project, I created a SPA using vanilla JavaScript, utilizing class-based components, SCSS styles and REST API.

Software tester at TwinSoft s.r.o

11-2017 – 07-2021

Brno, Czechia

- Manual and automated testing of a web application. Working with SQL database.
- Communication with clients. Cooperation during development – enhanced UX/UI.

Freelance Engagements

2021 – 2023

UX/UI developer at Visitpro.eu (part-time, 2021/03 – 2022/12)

- Coding UI elements, UX consultation, and styling; *Tech: SCSS, GIT, Blazor, Next.JS.*

Front-end developer at Awincado.cz (part-time, 2023/04 – 2023/08)

- UI development and enhancing UX; *Tech: Remix, Tailwind, Docker.*

Skills

React (*Component patterns, clean code, performance optimization*)

Typescript (*Advanced usage from the perspective of library author*)

CSS (*Strong basics, SCSS, Bootstrap, Tailwind, CSS-in-JS, Styled components*)

HTML and Javascript (*Modern JS and semantic HTML, strong basics*)

Front-end libraries and tools (*AgGrid, MUI, Redux, Svelte, NextJS, Remix, Storybook, Vite/Webpack/Rollup/Gulp, Cypress, Jest*)
